I. GENERAL INFORMATION

A. Background: The Centers for Medicare & Medicaid Services is directing the Multi Carrier System to establish a processing log for HMBI services within the Customer Information Control System application. The application log file will capture a snapshot of the Query and Response from the HMBI service calls and the log will be backed-up and cleared on a periodic basis. The availability of the log files provides a greater opportunity for the maintainer to research and review issues and more quickly resolve problems.
